MOHIT BUDHATHOKI

Network Technician | IT Support | Aspiring Cybersecurity Professional

Kathmandu, Nepal | +977 9845666125 | mohitbudhathoki040@gmail.com

PROFESSIONAL SUMMARY

Network Technician with hands-on experience deploying, configuring and troubleshooting LAN, WAN and Wi-Fi infrastructure, supported by a BE (Honours) in Computing majoring in Computer Networks Engineering. Skilled in IP addressing, DHCP, DNS, structured cabling and network diagnostics, with a disciplined approach to technical documentation and escalation to senior engineers. Prior hospitality operations experience built accuracy, stakeholder communication and problem-solving under pressure. Developing cybersecurity and ethical hacking capability through a Kali Linux lab, TryHackMe labs and Cisco Packet Tracer projects.

CORE SKILLS

Networking: IP addressing, LAN/WAN, Wi-Fi, routers, switches, access points, modems, DHCP, DNS

Troubleshooting & Support: Network diagnostics, fault isolation and resolution, technical support, incident and configuration documentation

Infrastructure: Structured cabling, termination and testing; equipment installation, upgrade and replacement

Security (foundational): Baseline network security configuration; ethical hacking and security labs (self-study)

Tools & Platforms: Cisco Packet Tracer, Wireshark, Kali Linux, MS Office (Excel, Word, PowerPoint)

Languages: English, Nepali, Hindi

PROFESSIONAL EXPERIENCE

Network Technician
Oct 2025 – Present

Lavish Technology Pvt. Ltd. | Kathmandu, Nepal

- Deploy, configure and maintain network infrastructure, including routers, switches, access points and modems, for client sites and user workstations.
- Monitor network performance; diagnose and resolve connectivity, hardware and configuration faults across LAN, WAN and Wi-Fi environments.
- Configure and maintain IP addressing, DHCP, DNS and baseline network security settings.
- Perform structured cabling, termination, testing and fault-finding.
- Support the installation, upgrade and replacement of networking equipment.
- Maintain accurate documentation of network configurations, equipment inventory and troubleshooting activity.
- Escalate and collaborate with senior IT and network engineers to resolve complex technical issues.

On-the-Job Trainee, OTA Department
Mar 2025 – Sep 2025

Barahi Hospitality and Leisure | Kathmandu, Nepal

- Completed a structured six-month programme in online travel agency (OTA) operations, covering reservations, rate and inventory management and guest communication across booking platforms.
- Collaborated with internal teams and OTA partners to resolve booking discrepancies and maintain listing accuracy.
- Processed reservations from OTA platforms and direct sales calls, ensuring accurate data entry and confirmation in the property management system.
- Managed OTA extranet updates (availability, stop-sells, inventory), performed daily multi-channel rate-parity audits and prepared sales reports in Excel.

EDUCATION

Bachelor of Engineering (Honours) in Computing
2022 – 2025

Naaya Aayam Multi Disciplinary Institute | Major: Computer Networks Engineering

High School – Technical and Vocational Education (Computer Engineering)
2020 – 2022

Bal Uddhar Secondary School

PROFESSIONAL DEVELOPMENT & INTERESTS

- Home lab: Kali Linux virtual machine on VMware Fusion, used to learn Linux, networking and security fundamentals.
- Network project: built and simulated a network in Cisco Packet Tracer; use Wireshark for packet analysis.
- TryHackMe: completing hands-on cybersecurity labs to build practical security skills.
- Interests: cybersecurity, ethical hacking, AI and automation; kickboxing, travel and cultural exploration.
